## Voice

### 23 Lines Included

- Local & Long Distance Calling
  - **Unlimited** LATA wide calling
  - **5000 Minutes** of long distance calling across the U.S. (domestic)
- IP Fax Line (x1)
 

Spirit's IP fax line allows a customer's preexisting fax machine to transmit and receive fax messages securely & confidently utilizing IP without the need for an additional copper line.
- x23 Voice Lines
 

The voice lines can be configured as analog lines, PRIs or trunks based on the customer requirements. This is a converged service interconnecting with existing PBX or Key systems. By converged we mean that the voice and Internet portion of the service share the same circuit, or bandwidth.
- x40 DID's

## Equipment

#### -Spirit's Carolina Based Support

Get the attention your business deserves with Spirit Communications' 24x7x365 Carolina based Network Operations Centers. Spirit's Certified/Qualified Technicians are ready to assist without multiple transfers and lengthy hold times.

#### - 100 Mb Ethernet Circuit w/ Internet

Get the connection needed for tomorrow today. Business Internet and Data needs multiply year after year. Spirit Communications' On-Net reliable fiber based Ethernet circuit with 99.999% durability with symmetrical (100Mb download, 100Mb upload) and dedicated bandwidth assures a quality connection now and into the future.

#### - LTE Secure Access Backup

Spirit LTE Secure Access is a flexible add-on solution for customers that need an affordable secondary network connection to keep critical voice, data and Internet traffic safe. Its multi-function design makes it ideal as a failover solution for your primary network or as a mechanism to extend your MPLS network to remote locations.

#### - Monitoring Portal

Operators and engineers get real-time and historical visibility for troubleshooting and capacity-trending purposes, while executives have access to clear and concise summary reports.
